Employees can compare and enroll in plans quickly and easily

Manage and Streamline Benefits Enrollment

Who likes the stress of managing enrollment with paper forms? Surprisingly, that's how many companies still do it. With Enrollment Services you can gain comprehensive electronic enrollment support and eliminate paper forms! All of your benefits enrollment processes will become quicker and more manageable through an easy-to-use online system.

Integrated with the EbixBenergy Communications platform, you can manage open enrollment and ongoing life event changes electronically, while giving employees 24/7 online access to the information they need to make informed benefits decisions quickly and easily. Employees can review plan details, side-by-side plan comparisons, and dynamic plan tours. And they can enroll using an intuitive, multi-step process. Upon completion of the enrollment process employees will receive confirmation statements showing the plans they enrolled in along with associated costs.

BENEFITS:

- Eliminate paper-based enrollment processes and reduce HR administration
- Provide employees 24/7 online access to benefits information
- Educate employees on their benefits plans with decision support tools
- Give employees access to unbiased and credible health information and tools
- Automatic feeds to carriers and HRIS/Payroll systems

EbixBenergy solutions are designed to help employers save time, save money and reduce compliance risks - all with the goal of significantly streamlining benefits management processes end-to-end.

And for employees, our solutions offer online access to the information they need to better manage their benefits and better manage their lives—including award-winning health and wellness resources and benefits helpline support.

EBIXHEALTH

www.AtlanticBenefits.com

Enrollment Services help employers and employees through various enrollment events including:

- New hire enrollment
- Open enrollment
- Qualifying life event changes
- Voluntary benefits campaigns

Communications

Enrollment Services is integrated with the EbixBenergy Communications platform, the portal employees rely on for up-to-date information and tools about their benefits and HR programs. That means there is only one destination for education and enrollment with a single log-in. With the open email enrollment messages feature you can quickly and easily send customized email enrollment reminders for Open Enrollment, Life Events, and Year Round Enrollment. You have the flexibility to send emails to employees within specific departments or locations, as well as to work or home emails.

You can access enrollment message reports so you can track the emails that were sent, the employees the emails were sent to, and key demographic data about the employees. And, you can generate reports based on enrollment type, location, and department.

Decision Support Tools

With information about benefits plans available within EbixBenergy, decision making becomes simple. As employees prepare to make benefits elections, they will have access to side-by-side plan comparisons, plan video tours, life event checklists, online calculators, and other decision support tools, so they can make the best decisions for themselves and their families.

Self-Service

Enrollment Service's intuitive election screens help employees review and update personal and dependant data before they make each benefit election. The eligibility rules and logic configured into the system eliminate mistakes that often plague the paper enrollment process. When finished, employees can view and print a confirmation statement.

Data Management

As an employer, you benefit from centralized data management provided by Enrollment Services. This product offers flexibility in importing and exporting data to and from carriers, HR management systems, and payroll.

Reporting

Employee benefits enrollment administration is information intensive. Administrators need reports to track employee status in company benefit plans, premium changes, and important benefits related events. Creating reports often involves spending a lot of time compiling data from different sources or spending money to develop custom reports.

The Enrollment Reporting Suite provides a comprehensive solution for your enrollment reporting needs. The suite contains nearly 50 standard reports including reports for:

- Billing
- Transaction History
- Open Enrollment
- Life Events
- Changes made during a plan year

Once you are comfortable with the standard reports, you can explore the real power of the suite with ad hoc reporting. Ad hoc reporting allows HR personnel and benefits administrators to quickly and easily create, format, categorize, and distribute reports tailored to your specific business situation.
