

## Your Most Comprehensive Health Management System

There has never been a greater need for wellness programs to help employers create a healthier workforce and reduce healthcare costs. That's why we're excited to introduce WellnessWorks, the most comprehensive health management system on the market including benefits communication, enrollment and wellness in a single solution that's simple to deploy, simple to use and simple to administer.

The foundation of each WellnessWorks program is the Member Health Assessment (MHA) and biometric screening, which raise employees' awareness of the risk factors that are impacting their long-term health, while providing employers with aggregate reporting on the health of their employees.

WellnessWorks serves as the hub for employees to manage their program participation where they'll automatically see their personal health profile and individual health score, along with employer incentives and contributions based on meeting health activity and outcome goals. They'll use the site to take assessments, schedule on-site screenings, set up interactive coaching sessions, obtain information to manage specific risk factors, and log activity points for incentives. Plus employees can securely review their WellnessWorks info anytime from any mobile device.

With WellnessWorks, administrators can easily track and monitor the results of their wellness program with in-depth, online, on-demand reporting. They'll have access to comprehensive communications templates, health improvement tools and activities.

### BENEFITS:

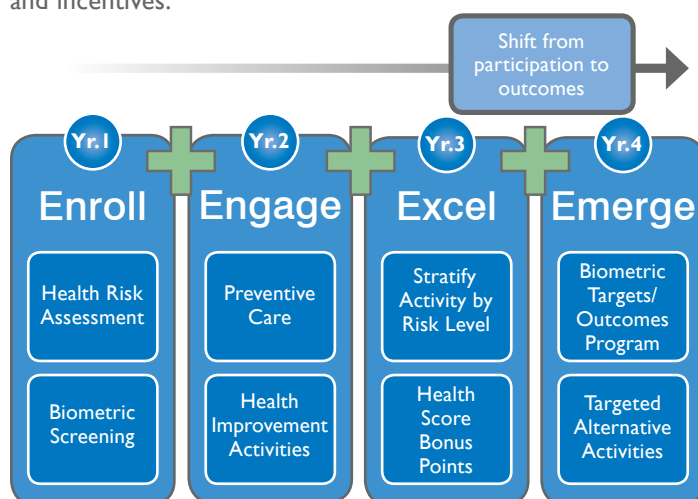

- Help employees make smart health decisions
- Increase workplace productivity
- Achieve better health outcomes
- Reduce healthcare costs
- Increase employee acquisition and retention
- Engage with hard-to-reach employees
- Track and report on wellness program ROI

- **Enroll** focuses on health awareness and is based on a 100-point system, with requirements including the MHA and biometric screening.
- **Engage** creates risk factor reduction and engages members in behavior change through a variety of wellness activities. It is based on a 200-point system, with requirements including the MHA, biometric screening and preventive care compliance.
- **Excel** encourages behavior change through health score bonus points. It is based on a 300-point system, with requirements including the MHA, biometric screening and preventive care compliance, as well as engagement in program activities.
- **Emerge** further accelerates culture change. It is based on a 400-point system, with requirements including the MHA and biometric screening, participation in preventive care compliance, as well as meeting targeted biometric values or completing targeted health activities.

## Options to Fit Your Organization

As an employer, you can choose from four best-in-class programs depending on how quickly you want to accelerate your wellness program. You're provided with communication materials to help educate and engage your workforce. In addition, you'll be able to access aggregated, on-demand reporting to track employee participation – from results of screenings and assessments to points earned towards rewards and incentives.
